

PlanetS Site Visit 19. + 20.05.2015 - Posterliste

Poster Nr.		Project	Title
Day 1	Day 2		
Nr.1		1	Dust properties in circumstellar disks
Nr.2		1	Direct detection and characterization of exoplanets
Nr.3		2	Accretion of terrestrial planets: timing and origin of the volatile components
Nr.4		2	Chronology of Chondrule Formation
Nr.5		3	Wild Weather on Warm Worlds
Nr.6		3	Reconcile large telescopes with high spectral resolution
Nr.7		5	Evolution of Exoplanets and Exoplanetary Atmospheres
Nr.8		5	Planetary compositions - The C/O ratio
Nr.9		6	GENGA: A GPU planetary simulation code
Nr.10		6	Possible pathways to rapid planetesimal formation in vortices triggered in protoplanetary disks
Nr.11		7	On the road to system architecture
Nr.12		7	New tools for new planets
Nr.13		DACE	Data and Analysis Center for Exoplanets: bridging the planet archipelago
Nr.14		CHEOPS	CHEOPS
Nr.15		4	Properties of ice/dust mixtures in the laboratory and implications for planetary and exoplanetary observations
Nr.16		4	Rosetta/OSIRIS and TGO/CaSSIS: Data analysis and visualization
	Nr.17	Comm	Communication and Outreach
	Nr.18	Techno	Technology Platform
Nr.19		DACE	DACE demonstration
	Nr.20	Academic	Advancement of Women and of Young Researchers
