Technology Transfer
Universities of Basel, Bern and Zürich

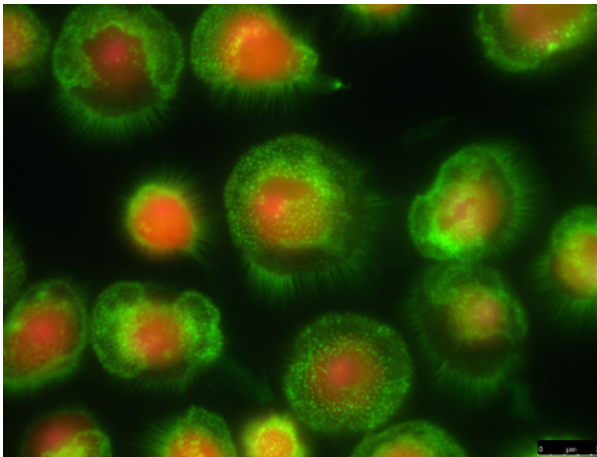

- ▶ bundles and nurtures UZH's ecosystem of **innovation and entrepreneurship** supporting people, programs and initiatives across the campus
- ▶ connector to **bridge students, researchers and external partners**
- ▶ accelerates the further development of **new inventions, discoveries and ideas**
- ▶ supports the transfer of innovative research to create **societal impact**
- ▶ Four strategic innovation clusters established to foster innovation in specific cross-cutting areas
 - innovation clusters operate university-wide and are strongly oriented towards interdisciplinary collaboration
 - Community driven
 - Foster exchange among researchers and with industry

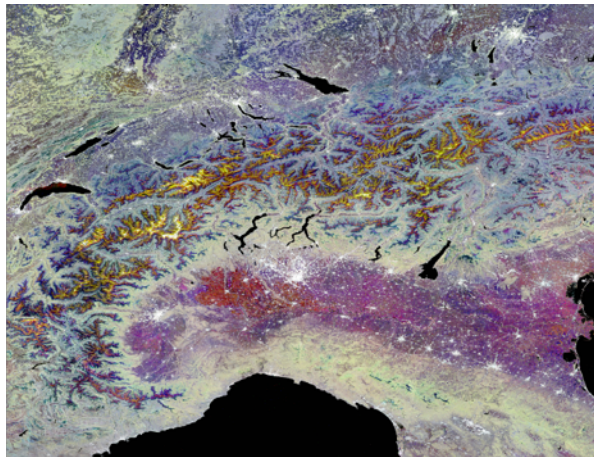

More than 25 research groups Grouped around four main Pillars

Space Life Science

Gravitational Biology
Fluid Physiology
Human Centrifuge
Hypoxia in Space
Spinal Health

Earth Observation

Biodiversity Observation from Space
Drone & Airborne Observation
Imaging Spectroscopy
Glacier Monitoring
SAR/LiDAR

Astrophysics

Euclid and the Dark Universe
Juno Mission
LISA-SIGO
Planet Formation

Aviation and Drones

Swiss Parabolic Flights
Noise Reduction of ariplanes
Drones
